

SUREN A. JEWELS

Cloud Infrastructure & Security Engineer

Redmond, WA • +1 (206) 356-6900 • SurenA.Jewels@gmail.com • [LinkedIn.com/in/SurenA-Jewels](https://www.linkedin.com/in/SurenA-Jewels) • [GitHub.com/SurenA-Jewels](https://github.com/SurenA-Jewels) • U.S. Citizen

SUMMARY

Cloud Infrastructure and Security Engineer with 8+ years of U.S. enterprise experience (25+ years globally) spanning federal GovCloud (FedRAMP, IL4/IL5), aerospace, and enterprise IT. Hands-on production experience with Puppet-based infrastructure automation, Azure and AWS administration, and Python/PowerShell/Bash scripting for capacity and security operations. Managed 1000+ servers across global data centers, recovered \$2M+ in reclaimed hardware assets, and maintained 99.8% uptime for federal production environments. Currently deepening AWS/GCP architecture skills and expanding into AI-native, agentic-systems engineering through active coursework and applied projects.

TECHNICAL SKILLS

- **Cloud Platforms:** Azure (UPS; Cognizant/ServiceNow – AD & M365 administration) · AWS (Amazon Project Kuiper infrastructure; Bellevue College Cloud Architecture labs) · GCP (coursework; hybrid-environment exposure at ServiceNow)
- **Infrastructure as Code:** Puppet – hands-on, production (ServiceNow Cloud Capacity Engineering); Terraform & Ansible – coursework/self-study, not yet production
- **Scripting & Automation:** Bash – Linux server administration (ServiceNow Cloud Capacity Engineering; prior ICT infrastructure role); Python – ticket/report and capacity-handover automation (Cognizant & HCL at ServiceNow); PowerShell – Active Directory automation (UPS, Cognizant, HCL at ServiceNow)
- **Security & Compliance:** FedRAMP · IL4/IL5 · NIST 800-171 · Zero Trust · MFA/PAM · YubiKey · CrowdStrike · Zscaler · DLP · GlobalProtect · Citrix · SNCA v1 & v2
- **Identity & ITSM:** Active Directory / Azure AD · Okta · Intune / Jamf · ServiceNow · Jira · Confluence

PROFESSIONAL EXPERIENCE

Cloud & Infrastructure Consultant

Apr 2020 – Present

Freelance / Self-Employed – Bellevue, WA (Part-Time)

- Deliver infrastructure and security engineering services for small-business and residential clients: 180+ security and configuration audits, remediating 300+ vulnerabilities across Windows environments with zero post-engagement breaches.
- Resolved 200+ infrastructure incidents (95% first-session resolution) and delivered 500+ secure remote-administration sessions (RDP, AnyDesk, Zoom) with 99%+ reliability.
- Provide on-demand consulting through GLG (Gerson Lehrman Group) advising enterprise clients on cloud infrastructure and IAM strategy.
- Sustained client engagements between full-time contracts while completing the Bellevue College Cloud Architecture & Services certificate (AWS-focused labs; final quarter in progress) and the University of Washington Machine Learning certificate (graduated June 2026), maintaining technical currency during transitions between roles.

System Development Engineer

Dec 2024 – Feb 2025

H10 Capital (contracted to Amazon Project Kuiper) – Kirkland, WA

- Deployed 5 EGSE (Electrical Ground Support Equipment) racks on AWS-connected satellite testing infrastructure for Amazon's Project Kuiper, achieving 100% system readiness across Linux-based ATE and Windows-based KTE systems.
- Authored 5+ deployment procedures in Confluence and Quip, cutting new-engineer ramp-up time 40% for a 15-person team; maintained 12 compliance checklists with zero critical findings across 4 quarterly audits.

Cloud Capacity Engineer

Jul 2024 – Oct 2024

HCL America Inc. (contracted to ServiceNow) – Kirkland, WA

- Managed capacity across 1,000+ production Linux servers spanning global PODs (ORD, SJC, BWI, PHX, IAD, AUS, YYZ, YCG), using Puppet for configuration management and Bash for server lifecycle scripting, cleanup, and decommissioning.
- Built Python scripts to automate daily capacity handover reports and shift transitions across 3 global teams (US, Ireland, Australia); worked in a hybrid multi-cloud environment with GCP exposure alongside core AWS/Azure operations.
- Processed capacity requests (CRQ), interruption (INT), and change (CHG/CTask) tickets; reclaimed 75+ underutilized servers and recovered \$2M+ in hardware through systematic decommissioning, improving utilization 32%.
- Resolved 20+ weekly capacity incidents (avg. 5.5-hour resolution) maintaining 99.9% service continuity across shared and private allocation tiers.

IT Systems & Security Analyst

Dec 2023 – Jul 2024

Cognizant (contracted to ServiceNow) – Kirkland, WA

- Delivered IL4/IL5 clearance-level Azure and Active Directory administration for 500+ government users across 12+ federal agencies, maintaining NIST 800-171 and FedRAMP compliance for GCC/NSC environments.
- Wrote PowerShell scripts for AD account provisioning and lifecycle management (150+ new accounts quarterly) and Python scripts to automate incident-ticket tracking and reporting across 900+ ServiceNow escalations at 98.3% SLA compliance.
- Managed YubiKey provisioning and identity verification (ADM, NSC, GCC tiers) with 100% security-compliance rate; supported VDI infrastructure across 15+ time zones.

Systems Support Technician

May 2021 – Apr 2024

UPS – Seattle/Redmond, WA

- Provided Azure-based systems and network support across the Northwest Region (WA, OR, ID, MT, AK), maintaining Zebra printers, barcode scanners, and conveyor-scanning infrastructure across 5+ regional hubs.
- Wrote PowerShell scripts to automate routine device checks and support tasks, reducing manual workload and improving ServiceNow ticket routing and SLA compliance; achieved 98% resolution rate with zero major incidents during peak periods.

Network Field Engineer

Jun 2017 – May 2019

Charter Communications – Dallas, TX

- Engineered and installed 1,800+ residential network connections (fiber/coaxial), performing RF signal analysis and optimization to maintain 99.2% network uptime across shared infrastructure.
- Led technical development of 8 junior field engineers and generated \$240K in network upgrades through customer consultation, achieving 97% first-visit completion and 4.4/5 satisfaction.

ADDITIONAL U.S. EXPERIENCE

Hardware System Engineer, SMS Info-Comm (contracted to HP) – Grapevine, TX

Feb–Jun 2017

Rural Carrier Associate, USPS – Bainbridge Island, WA

Dec 2019–Apr 2020

Delivery Associate, Amazon – Seattle, WA

Jun–Dec 2019

Administrative Support Specialist, City of Seattle (COVID-19 vaccination operations)

Mar–Jun 2021

INTERNATIONAL EXPERIENCE (2000–2016)

- **Senior IT Support Technician, Sari Computer** – International (2013–2016): Hardware/software support for 300+ clients, 700+ system installations, 90% first-contact resolution.
- **ICT Infrastructure Specialist & Faculty Lecturer, Multiple Universities** – International (2006–2012): Managed university-wide IT infrastructure (150+ servers, 25+ network segments) using Bash for Linux administration; taught network security and systems administration to 900+ students/semester.
- **Founder & Owner, FarazWare Co.** — International (2000–2012): Built and led an IT services company delivering CRM, infrastructure, and automation projects for 150+ clients.

CERTIFICATIONS

AWS Cloud Architecture • Microsoft Azure Fundamentals (AZ-900) • Google Cloud Foundations & GCP for Enterprise • Terraform Essential Training (LinkedIn Learning) • CompTIA Cloud+ • CompTIA Network+ • CompTIA A+ • CompTIA Security+ (In Progress) • CCNA Cybersecurity (In Progress) • ITIL® 4 Foundation • Advanced PowerShell for AD Automation • Automation with Python and PowerShell for IT and Cybersecurity • Ubuntu Linux: Essential Commands & Administration • DevOps Foundations: Infrastructure as Code • Windows Server 2025

EDUCATION

Machine Learning Certificate – University of Washington, Seattle, WA

Graduated June 2026

Cloud Architecture & Services Certificate (Final quarter in progress) – Bellevue College, WA

2025–Present

M.S. Software Engineering – IUST

2004–2007

B.S. Computer Science – University of Arak

1999–2004
